U. S. Department of Energy Office of Civilian Radioactive Waste Management

Update on the Role of the M&O Contractor

Robby L. Robertson General Manager M&O/TRW Vienna, VA

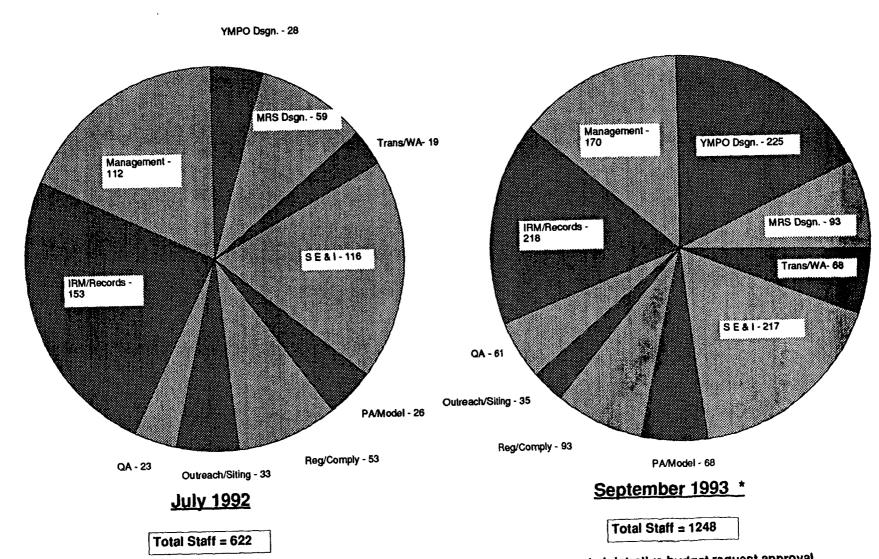

CRWMS M&O Organization

Team

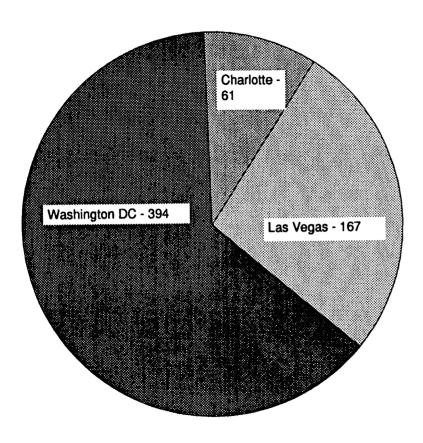

TRW Prime Contractor Fluor Daniel (Fluor) **Surface Facility Design and Development** Morrison Knudsen **Underground Facility Design and Development** (MKE) **Engineered Barrier Design and Development B&W Fuel Company** (BWFC) **Woodward Clyde Federal Site Characterization** Services (WCFS) Licensing, Outreach, MRS Design, QA **Duke Engineering (Duke)** INTERA **Performance Assessment** E.R. Johnson Assoc. (JAI) -**Storage and Transportation Analysis** JK Research Assoc. (JKA) -Socioeconomic and Policy Analysis Logicon - RDA (RDA) **Systems Engineering and Modeling Support**

M&O Manpower by Program Area

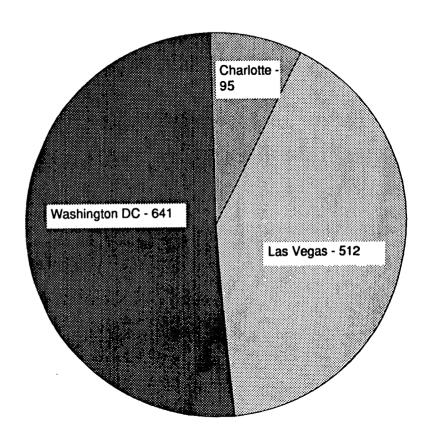

* Assumes administrative budget request approval.

M&O Manpower by Location

July 1992

Total Staffing = 622

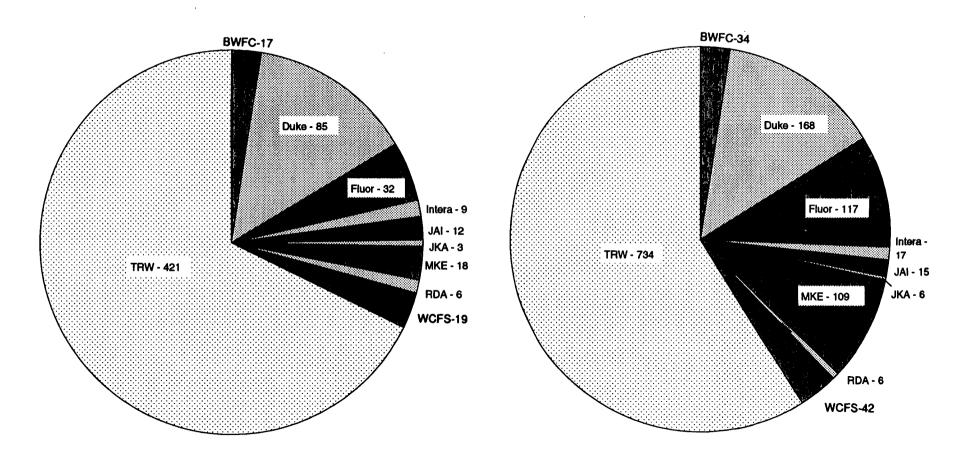

September 1993 *

Total Staffing = 1248

* Assumes administrative budget request approval.

M&O Manpower by Teammate

July 1992

Total Staff = 622

September 1993 *

Total Staff = 1248

Assumes administrative budget request approval.

Highlights of Progress to Date

- Successfully passed M&O QA Readiness Reviews
- Established program document hierarchy and are well into implementation
- Established a sound configuration management and change control system
- Providing lead support to strategic and contingency planning efforts
- Established new management and integration system with YMPO

Highlights of Progress to Date (Cont.)

- Initiated system and subsystem studies to define critical requirements and trade-offs
- Completed first draft License Annotated Outlines for MGDS and MRS
- Began site suitability issues resolution with NRC
- Completed MRS Conceptual Design
- Significant support to DOE, and Negotiator in MRS siting
- Assumed responsibility for technical direction and integration of site characterization

Highlights of Progress to Date (Cont.)

- Restructured performance assessment activities and assumed management and integration role
- Assumed responsibility for ESF construction management
- Undertaking rebaselining of Yucca Mountain site characterization program
- Assumed responsibility of all program records management
- Began development of InfoSTREAMS for records management and license support
- Lead role in 40 CFR 191 rule making

FY '93 Focus

- Fully audited M&O QA program
- Fully developed system studies roadmap and program decision network
- Complete balance of program management and technical baseline documentation
- Integrated program/project cost and schedule control systems
- MRS Title I and II designs
- MRS siting selection and evaluation

GM-9215

FY '93 Focus (Cont.)

- Phase I casks acquisition
- Full technical direction/integration of site characterization
- ESF Title II design
- Repository and EBS conceptual designs
- System-level performance assessment iterations
- Transition and ramp-up in Las Vegas

Summary

- Transition of the M&O into its management/integration role is going well
- The M&O, Program and Project QA, design control, management systems, and technical baselines will be in place to support a program ramp-up
- Adequate and predictable annual funding is essential to meet program goals and control program costs
