# **GA-4/9 Legal Weight Truck Cask Systems Review and Status**

**Presented to the Nuclear Waste Technical Review Board  
Arlington, VA**

**D. J. Nolan  
June 14, 1995**

---

# Status of GA-4/9 LWT Cask Systems

- **Background**
- **Significant milestones**
- **Future events**
- **Half-scale model fabrication**
- **Half-scale model testing**

# **Background—Cask System Development Program (CSDP)**

- **Five contracts awarded in 1988**
  - **Two legal-weight truck (LWT) casks**
  - **Three rail/barge (R/B) casks**
- **As a result of program redirection (i.e., MPC system development), CSDP focused on GA-4/9 cask system**
- **GA-4/9 LWT cask proceeding to certification**
- **LWT casks needed for truck cask reactor sites**

# Significant Milestones—GA-4/9 LWT Cask Systems

- Released fabrication of half-scale model Mar 93
- SARs submitted to NRC Jul/Aug 94
- LWT trailer durability test completed Feb 95
- DOE accepted LWT trailer Apr 95
- Received SAR Round 1 questions May 95

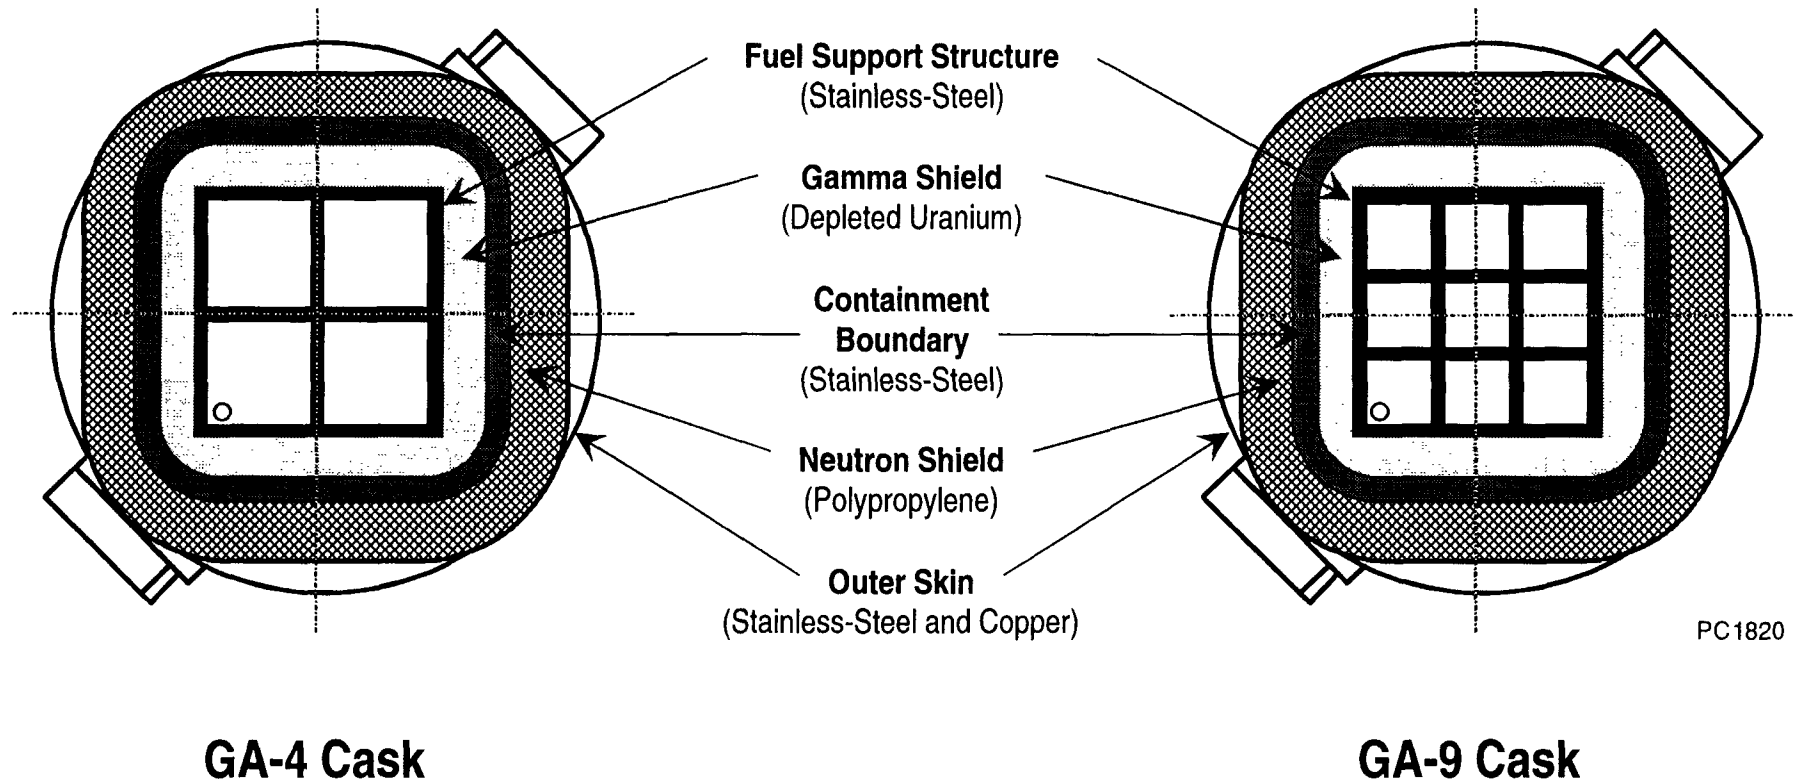

# Future Events—GA-4/9 LWT Cask Systems

- **LWT performance & operational testing**      **May 95 - Jun 96**
- **Fabrication of half-scale model**      **Aug 95**
- **Perform regulatory tests on cask model**      **Sep 95**
- **Submit test report to NRC**      **Nov 95**
- **Receive NRC certification of compliance**      **Jul/Aug 96**
- **Deliver GA LWT prototype cask per Program Plan**      **Sep 97**

# GA-4 Legal Weight Truck Cask

# GA-4/9 Cask Cross Sections

PC1820

# Key Design Features

- **Four PWR or nine BWR spent fuel assemblies**
- **Stainless steel cruciform spent fuel support structure**
- **Stainless steel liner**
- **Depleted uranium (DU) gamma shield**
- **Stainless steel outer shell**

# Key Design Features

- **Polypropylene neutron shield**
- **Forged bottom head**
- **Bolted lid closure**
- **Aluminum honeycomb impact limiters**
- **Access ports for draining, drying, and venting for in-plant operations**

# GA-4 Half-Scale Cask Model Body

**Material:** XM-19  
**Shielding:** DU  
**Weight:** 3,175 kg (7,000 lbs.)  
**Length:** 240 cm (94.5 in.)  
**Max. Dia.:** 50 cm (19.7 in.)

# GA-4 Impact Limiter Half-Scale Test Model

GA-4 IMPACT LIMITER  
HALF-SCALE TEST MODEL

# Half-Scale Model Fabrication

- **Outer shell**
- **Shell (XM-19) cold forming**
- **Hot forming of shell**
  - **Heated to 2000°F**
  - **Vertical press bending shell**
  - **Plate reoriented for second bend**
  - **Final shape after bending**

# Fuel Support Structure

- **Four wings welded to center piece**
- **Dimensions 4.5 x 83 x 5/16 inches**
- **Drilled holes for B<sub>4</sub>C pellets**
- **Approximately 300 holes per wing**

# Insertion of Fuel Support Structure

- **Inner liner fixtured for alignment**
- **Fuel support structure slides into keyways**
- **Lateral guides and vertical supports**

# Depleted Uranium (DU) Assembly

- **First ring placed over inner liner**
- **Inflatable bladder used to guide rings**
- **DU ring tapered**
- **Last ring being lowered over inner liner**
- **Completed assembly of DU rings**

# Placement of Outer Shell

- **Lifted by impact limiter bolt attachment lugs**
- **Start to slide outer shell over DU rings**
- **Impact limiter bolt attachment lugs**
- **Weld preparations on outer shell and bottom head**

# Impact Limiter Support Structure Ribs

- **Thirty-six ribs welded to both ends**
- **Different length to transition from square to round**
- **Fixture used hold and rotate model for welding on ribs**
- **Fixture to keep alignment of ribs during welding**

# Enclosure Shell for Impact Limiter Support Structure

- **Ten slots per rib**
- **Plug welds attach shell to ribs**
- **Tapered at edge to match impact limiters**

# Impact Limiter Housing

- **Inner structure for attaching honeycomb**
- **Tubes for impact limiter attachment bolts**
- **Gussets to reinforce during impact**

# Neutron Shield (Not Part of Model)

- **Outer shell**
- **Neutron shield blocks**
- **Neutron closure shell**
- **Aluminum tubes (not shown) transfer heat through neutron shield**

# **GA-4 Half-Scale Cask Model Regulatory (Drop) Testing**

- Awarded contract to Maxwell Laboratories Mar 95**
- Construct drop pad May 95**
- Review GA test procedures Jul 95**
- Perform benchmark tests with dummy cask Aug 95**
- Perform drop tests Sep 95**
- Complete test report Oct 95**
- Submit test report to NRC Nov 95**

# **Drop tests (in Accordance with 10CFR 71.73)**

- **Three 30-foot drops**
  - **Side horizontal**
  - **Side slapdown**
  - **Corner over center of gravity**
- **Three puncture drops**
  - **Into damaged impact limiter at lid**
  - **Into center of model horizontal**
  - **Into damaged impact limiter at lid closure seals**
