

Overview of LADS Process

**Presentation to:
Nuclear Waste Technical Review Board (NWTRB)**

**Presentation by:
Richard D. Snell
M&O/Fluor Daniel**

**Beatty, Nevada
June 29-30, 1999**

**U.S. Department of Energy
Office of Civilian Radioactive
Waste Management**

**Yucca
Mountain
Project**

Overview of LADS Phase II

- **Key Points**

- Recommendation to DOE; DOE has not yet made its selection
- Conceptual Design Development Process/Not optimization process
 - » Example: Drip Shield Design
- The set of five (5) enhanced design alternatives (EDAs) allowed focused review/evaluations
- Operational concepts are flexible and subject to further development (e.g. period of operation, ventilation rates and duration)

Overview of LADS Phase II

(continued)

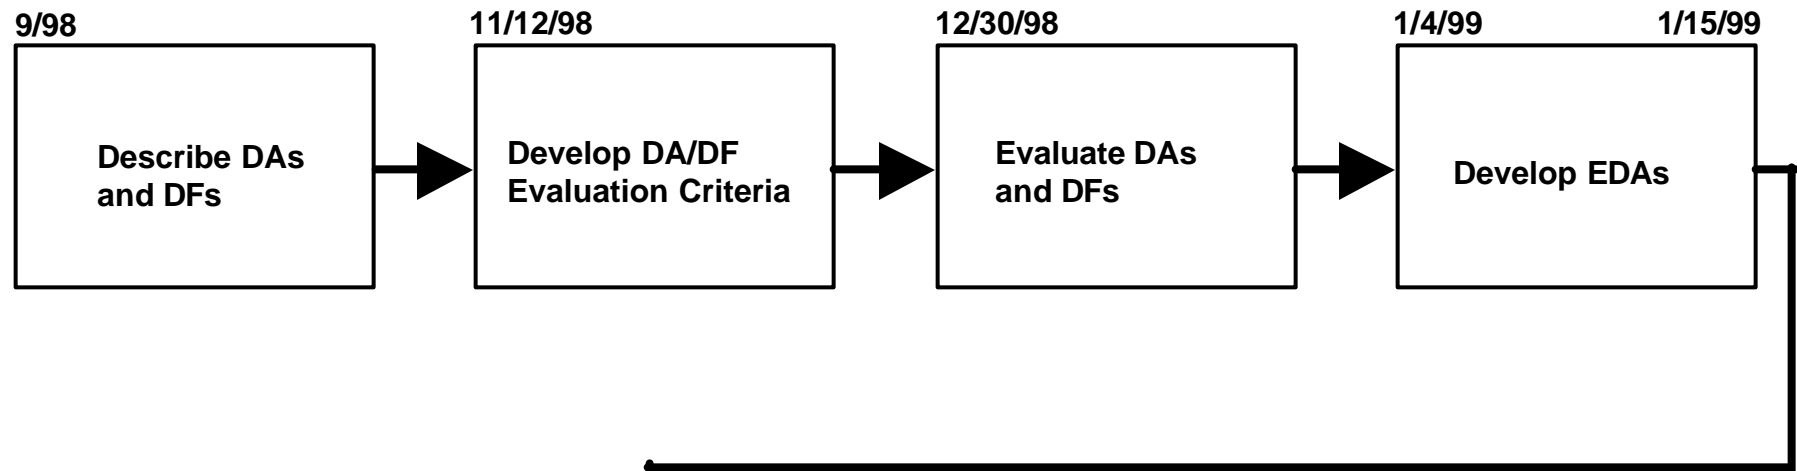

- **Key Points** (continued)

- **The following presentations briefly address:**

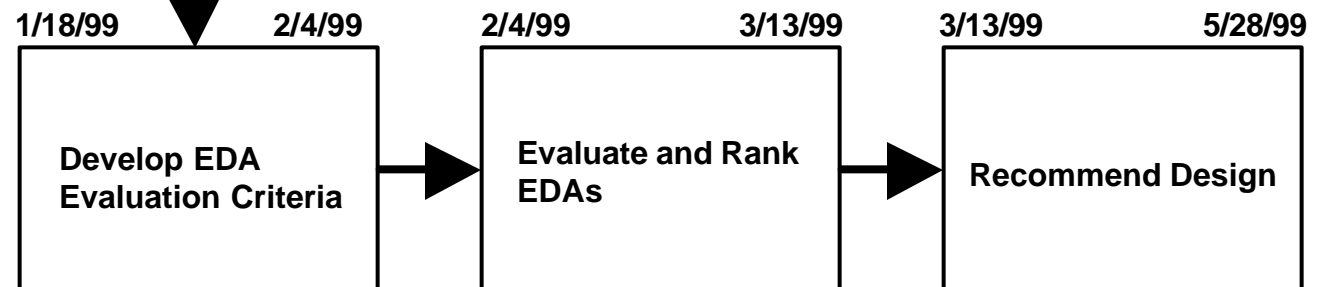

- » **EDA Descriptions**
- » **Evaluation Process Phase II**
- » **Uncertainties**
- » **Path Forward**

License Application Design Selection Two-Phase Process
