

## Board Consultant Reports on the Interim Report of the Yucca Mountain Igneous Consequences Peer Review Panel

The August 23, 2002, Interim Report of the Department of Energy supported Yucca Mountain Igneous Consequences Peer Review Panel was a topic of discussion at the September 10, 2002 Board meeting in Las Vegas. Subsequently, we received letter reports from Board consultants: Dr. Derek Elsworth (Pennsylvania State University); Dr. William Melson (Smithsonian Institution); and Dr. Meghan Morrissey (Colorado School of Mines). The consultants reviewed the Interim Report and the September 5, 2002, meeting of the Peer Review Panel devoted to that report.

Listed below are the consultant letter reports.

1. Letter report, Derek Elsworth, September 17, 2002
2. Letter report, William Melson, September 23, 2002
3. Letter report, Meghan Morrissey, September 21, 2002
